Mirion Technologies provides a complete line of hardware and software products targeted to Health Physics and Radiation Protection personnel, in order to meet current Nuclear Industry challenges. Covering a wide range of X-Ray and Gamma radiation detection, our DMC 3000 Electronic Dosimeter represents over 25 years of real-world electronic dosimetry experience, continually refined through customer feedback. The unique, high contrast and backlit LCD display provides a clear indication of wearer’s dose and ambient dose rate for deep dose equivalent. More importantly, multiple methods (audible, visual, and tactile) are utilized to alert the wearer of alarm conditions. The DMC 3000 offers all of this protection, for over 3000 hours of continuous use, with a single AAA alkaline battery.

The DMC 3000 offers an enhanced communication protocol for additional features and includes a compatibility mode for previous Mirion Technologies products including, Calibration tools, Access Control, Turnstiles and Telemetry infrastructure.
